

IT 483 - Program 1: Getting started

10 Points

Description

1. Create a new folder Prog1 under your main web site.
2. Create three HTML pages in folder Prog1: index.html, HtmlPage1.html and HtmlPage2.html.
3. The following should be the same on all three pages:
 - o The title should be "MNSU - IT483".
 - o There should be a navigation bar on the left using global links to point to at least three web sites.
 - o One of the three global links must use an image.
 - o No other content should be displayed above or below the navigation bar.
 - o The body begins with the title text " Web Applications and User Interface Design".
 - o Your first and last names should be displayed under the title text.
 - o Format of the title text: HTML element h1, centered, blue color, solid underlined.
 - o Format of your names: HTML element h2, centered, black color, italic. Font must be different from the title text.
 - o You must use an external CSS file to format the title text and your names (Later).
4. Page index has an HTML link with text "Next Page" that uses a relative link to point to page HtmlPage1.
5. Page HtmlPage1 has two HTML links with text "Previous Page" and "Next Page" that use relative links to point to page index and HtmlPage2, respectively.
6. Page HtmlPage2 has an HTML link with text "Previous Page" that uses a relative link to point to page HtmlPage1.
7. All the HTML links must be centered at the bottom of the pages.
8. At least one ordered list is displayed on one of the three pages.
9. At least one un-ordered list is displayed on one of the three pages.
10. At least one table is displayed on one of the three pages.
- 11.
